TEXHIBITION ISTANBUL

Held at the Istanbul Expo Center from March 5-7, 2025, Texhibition Istanbul welcomed 25,000 industry professionals from over 100 countries, delivering an innovative three-day experience for its visitors.

Organized by İTKİB Fair Inc. on behalf of İTHİB, the show has reached more than 100,000 visitors across its seven editions to date, growing stronger and expanding with each iteration.

The latest edition featured 539 participating companies showcasing an extensive product range spanning from woven and knitted fabrics to yarns, denim to printing and embroidery, and textile accessories to technical solutions. Texhibition Istanbul once again demonstrated the Turkish textile sector's impressive production capacity and design prowess on the international stage.

HEART of the TRENDS

The special areas designed under the name Trends Lab at Texhibition Istanbul Fair bring together participating companies' standout yarn, fabric, and accessory products around creative themes. In these trend-setting spaces that guide each season's direction, participating companies' innovative products are presented to visitors through thematic narratives and inspiring displays. Enriched with the latest technological developments and sustainable solutions from the industry, these creativityfocused areas serve as a futureshaping guide for all visitors, offering opportunities to make a meaningful impact in the sector.

FUTURE of TEXTILE: Innovation hub

One of Texhibition Istanbul's most captivating areas, the Innovation Hub, is making waves in the industry as the intersection point of technology and textiles. Curated by Arzu Kaprol and Filiz Tunca, this section showcases projects that generate significant interest by blending wearable technologies with sustainable fashion. featuring environmentally friendly and advanced technology-based products. The Turkish textile sector's achievements in innovation are being brought to the global stage through technical fabrics and digitalization-focused innovative projects. Shedding light on not only today's textile world but also tomorrow's. the Innovation Hub area hosts the technologies, production solutions, and sustainability strategies that will shape the future understanding of fashion.
