

TURKISH TEXTILES ON THE WORLD STAGE

Texhibition Istanbul showcases Türkiye's production power, design intelligence, and innovation capacity to the global stage. Visitors from across Europe, the Americas, the Middle East, and Asia gather at the show. Participants establish direct connections with leading buyers of the global fashion and textile industry—further consolidating Türkiye's leadership in the world textile market.

9th EDITION: MARCH 4-6, 2026

Texhibition Istanbul will open its doors for the 9th time on March 4-6, 2026. Growing with every edition, the trade show will continue to unite global buyers with producers. The upcoming edition will once again strongly reflect the Turkish textile sector's global vision, with a focus on sustainability, innovation, and new collaborations.

THE HUB OF GLOBAL CONNECTIONS

One of Texhibition Istanbul's strongest assets is its B2B meetings, which bring buyers and suppliers together face-to-face. Nearly 100 dedicated sessions united brands and manufacturers from across the world at the same table. These meetings opened the door to international collaborations and gave new momentum to the sector.

INNOVATION HUB: MATERIALS OF TOMORROW

The Innovation Hub is a showcase of textile technologies of the future. Smart fabrics, biotechnology-based materials, and AI-supported production methods are introduced in this area. With its creative curation, the Innovation Hub inspires the industry, highlighting the intersection of technology and design while offering professionals a unique experience to explore the future of textiles.

TRENDS LAB: A CENTER OF INSPIRATION

Each edition, the Trends Lab sheds light on the future of textiles through a different theme. This is where woven and knitted fabrics transform into storytelling, providing designers with a powerful source of inspiration. Visionary content ranging from digitalization to sustainability is presented through tangible examples of trends. For visitors, it offers not only products but also ideas that shape the fashion of tomorrow.

BLUE BLACK A GLOBAL POWER IN DENIM

Blue Black Texhibition brings Türkiye's global leadership in denim to the forefront. From sustainable production techniques to innovative designs, a broad spectrum is presented here. As the world's third-largest denim producer, Türkiye reflects both its heritage and its future in this field, turning Blue Black into an inspiring meeting point for denim professionals.

DENIM TRENDS AREA & WORKSHOPS

In the Blue Black area, not only collections but also interactive workshops and trend presentations cover a wide array of topics—from biomaterials to artificial intelligence, from trends to sustainability. Contributions from international experts give visitors a holistic perspective on the global textile ecosystem, while participants gain the opportunity to develop innovative ideas and business models.
